Why is Integration Important?
Information is the backbone of every aspect of the public safety process. Justice cannot be fairly and properly administered without complete and accurate information. In today’s public safety processes, many inadequacies exist in the collection, storage, and dissemination of information needed to make justice administration decisions, deploy resources, improve operational effectiveness and most importantly, protect citizens.

A detailed examination of justice and public safety processes reveals a complex series of iterative steps and organizational interactions that occur from the time a person enters the system until he/she exits the system. Each step or process requires the collection and dissemination of increasing amounts of information. Although there is a great deal of information stored electronically in Illinois, very little of it is available quickly across agency boundaries. Integration of public safety information is confounded by a combination of problems related to both information quality and information sharing.

What are the Benefits of Integration?
- Shared information is more accurate.
- Shared information is more timely.
- Shared information is more complete.
- Shared information produces more efficiency and effectiveness.

Vision
The IIJIS Governing Board envisions Illinois becoming a recognized leader in justice information sharing, benefiting all people in Illinois and across the nation by creating a statewide justice information sharing capability that provides secure and timely access to accurate and complete information throughout the justice enterprise. Through integrated justice information sharing we will enhance the safety, security, and quality of life in Illinois; improve the quality of justice, the effectiveness of programs, and the efficiency of operations; and ensure informed decision-making, while protecting privacy and confidentiality of information.

Mission
Our purposes are to:
- Bring stakeholder organizations together to comprehensively and effectively plan justice information systems,
- Coordinate information systems development activities,
- Build and expand the range of effectiveness of information systems and sharing capabilities, and
- Improve the effectiveness, efficiency, timeliness, accuracy, and completeness of information.

The IIJIS Governing Board represents justice agencies spanning the full spectrum of the justice enterprise, including law enforcement, prosecution, defense, the judiciary, corrections, and relevant non-justice agencies, at city, county, and state levels.

How Does Integrated Justice Information Benefit Me?

Public
• Improved justice, public safety, and homeland security
• Increased protection of the innocent
• Improved government services
• Appropriate public access to data
• Improved access to information for victims and witnesses

Law Enforcement
• Increased ability to provide justice, public safety, and homeland security
• Increased officer safety
• Rapid identification and background information for potentially dangerous individuals
• More complete and accurate information at key decision points
• Enhanced intelligence information sharing

Corrections/Parole
• Increased correctional officer safety
• More informed decisions for correctional placement
• More informed parole decisions
• Timely notification of parole violation
• Rapid positive identification
• Reduced inmate processing time

Defense Attorneys
• Increased ability to protect the innocent
• More timely access to case history information
• Online case tracking
• Enhanced ability to manage caseloads
• Minimized redundant data entry

 Judges
• More complete information at key decision points
• Rapid electronic access
• More complete records
• More effective and efficient case management
• More rapid and complete orders and decisions

State’s Attorneys
• More informed charging decisions
• Rapid access to accurate information
• Elimination of redundant data entry
• More complete case histories
• Online case tracking
• Rapid positive identification

Probation
• Timely and accurate access to information
• Timely notification of re-arrest or violation of terms
• More timely and accurate client information
• Minimized redundant data entry
• More complete information on previous criminal proceedings

Public Officials
• More efficient use of fiscal resources
• Improved public safety
• Improved government services
• More informed policy decisions
• Increased public confidence

Enhanced safety, security, and quality of life for all people in Illinois.
